New from WSOHP's Research on Dropping Out...

"I'm no good in math..." [December 2013]

In a new research summary based on more than 50 in-depth interviews with youth who have dropped out, we explore youths' perspectives on a variety of topics related to math teaching and learning. For many of these disconnected youth, math presented significant learning challenges. From their point of view, math often functioned in secondary school as an academic tripwire over which they stumbled and did not recover. [Read more...](#)

Articles & Reports: Find more articles related to student engagement, truancy and dropping out at the WSOHP [blog](#). In addition, the project web site contains a four-part report series, [Pathways to Dropping Out](#), completed in Spring 2013, as well as other resources related more generally to issues of truancy and dropping out.
